Policy On Adverse Drug Reaction/Event

Prepared date: 05/09/2023

Reference: MOM.8.d.NABH Standards – 5th Edition

Issue Date:05/09/2023

Issue no: 02

Review No: 1

Review date: 04/09/2024

1.0 Purpose:

To establish a framework for the identification and review of adverse drug reactions (ADRs), thereby to;

- 1.1 Inform healthcare providers about ADRs to improve patient care
- 1.2 Identify trends to prevent future ADRs
- 1.3 Define the role of medical, nursing, pharmacy, and other healthcare personnel in ADR reporting to insure multidisciplinary participation
- 1.4 Report and evaluate ADRs occurring in the organization

2.0 DEFINITION:

- 2.1 An ADR is any noxious, unintended, undesirable, or unexpected response to a drug that occurs at doses used in humans for prophylaxis, diagnosis, or therapy, excluding therapeutic failure
- 2.2 ADRs are to be reported if they result in any of the following
 - 2.2.1 Hospital admission
 - 2.2.2 Adjustment or discontinuation of drug therapy
 - 2.2.3 Requirement of systemic treatment
 - 2.2.4 Prolongation of hospital stay
 - 2.2.5 Complication of diagnosed disease state
 - 2.2.6 Patient death

3.0 PROCEDURE:

- 3.1 Orientation for all medical, nursing staff and pharmacists describing the importance of ADR reporting and the role of the healthcare provider in the ADR reporting program
- 3.2 Adverse drug reactions meeting at least one of the criteria stated in definition shall be reported by raising an incident report within 24 hours from the time of occurrence.
- 3.3 Medical / nursing / pharmacist shall be responsible for reporting suspected ADRs that meet the above definition and reporting criteria. ADRs are reported by completing the Patient Incident Report form.
- 3.4 The patient's primary physician shall be responsible for confirming or ruling out any suspected adverse reaction reported to them or identified by them.
- 3.5 The patient's primary physician shall document the reaction in the patient's medical record when an adverse drug reaction has been confirmed.
- 3.6 All reported ADRs shall be reviewed monthly by the Drug & Therapeutics committee
- 3.7 A summary of reported ADRs shall be forwarded to the Quality Team on a Monthly basis.

4 ADR (Hartwig's) Severity Assessment Scale.

Level 1 An ADR occurred but required no change in treatment with the suspected drug

Level 2 The ADR required that treatment with the suspected drug be held, discontinued, or otherwise changed. No antidote or other treatment requirement was required. No increase in length of stay (LOS)

Level 3 The ADR required that treatment with the suspected drug be held, discontinued, or otherwise changed. AND/OR An Antidote or other treatment was required. No increase in LOS

Level 4 Any Level 3 ADR which increases length of stay by at least 1 day. OR The ADR was the reason for the admission

Level 5 Any Level 4 ADR which requires intensive medical care

Level 6 The adverse reaction caused permanent harm to the patient

Level 7 The adverse reaction either directly or indirectly led to the death of the patient

ADR: adverse drug reaction.

Mild = Levels 1 and 2; moderate = Levels 3 and 4; severe = Levels 5, 6 and 7

- Adverse drug reactions are reactions to the drugs that could have occurred due to the inherent conditions of the patient or the inherent properties of the concerned drug
 - Adverse drug reactions are captured through the ADR form and a registry of concerns is maintained by the pharmacy team
 - The ADR is presented to the Deputy Medical superintendent for further action & discussion in the Drugs & Pharmaco-Therapeutic Committee for further directions with regards to the process
