8.0 PROCESS DETAILS:

8.1 DESCRIPTION OF THE PROCESS

To maintain complete and accurate Medical records for every patient of the hospital receiving services (both IP & OP) such that it reflects continuity of care.

- An inpatient's medical record is complete when the following criteria are met:
 - It's contents reflect the patient's condition on arrival, diagnosis, test results, therapy, condition and in-hospital progress and condition at discharge; and
 - It's contents, including any required discharge summary or final progress notes, are assembled and authenticated; and

- Entry of Medical record: The medical records can be entered by
 - Treating consultant and Cross referred consultant
 - Resident Medical Officer, Duty Medical Officers, Coordinator - Clinical Services
 - Physiotherapist
 - Dietician
 - Nurse (only in nursing records)
 - The physical examination should reflect a comprehensive current physical assessment.
 - The recorded history and physical examination must be authenticated by a practitioner privileged to do so – preferably the primary consultant
 - When a patient is readmitted within 30 days for the same or related problem, an interval history and physical examination reflecting any subsequent changes may be used in the medical record provided the original information is readily available.

CONTENTS OF THE MEDICAL RECORD FOR INPATIENTS

➤ Charts and Forms

- Patient Registration Form with his/her personal and Demographic Details
- General Consent for admission

➤ Content of the Medical Record

- The content of the medical record, which includes written, must be sufficiently detail, legible and organized to enable:
 - The practitioner responsible for the patient to identify the patient, provide continuing care, determine the patient's condition at a specific time, review the diagnosis and therapeutic procedures performed and the patient's response to treatment;
 - Another practitioner to assume patient care at any time;
 - And the retrieval of information required for utilization review, quality review, transfer recommendations, etc.
- Hospital inpatient medical records are required to contain at least the following:
 - The patient's name, address, date of birth, sex and name of any legally authorized representative (Provision to be made in admission / discharge form).
 - The patient's language and communication needs;
 - Documentation and findings of the patient's assessment;
 - Conclusions or impressions drawn from the medical history and physical examination;
 - The diagnosis, diagnostic impression or condition;
 - The reason for admission or care, treatment and services;

- Consideration of education needs and daily activities
- Family and/or guardian's expectation for and involvement in, the assessment, treatment, and continuous care of the patient
- The physical examination should reflect a comprehensive current physical assessment.
- The recorded history and physical examination must be authenticated by a practitioner privileged to do so preferably the primary consultant
- When a patient is readmitted within 30 days for the same or related problem, an interval history and physical examination reflecting any subsequent changes may be used in the medical record provided the original information is readily available. Normally Medical Officer Review the chart incase of re – admission. However the registered information pertaining to the patients is available in the Discharge Summary issued, which is taken into account.
- Documentation of consideration of educational needs and daily activities.
- Documentation of periodic review of the planned course of action, as appropriate. The treatment-planning process is completely individualized, based on current patient needs and clinical status. The treatment plan is updated when the patient's needs and response to treatment change. Documentation of daily progress notes with appropriate annotation of the patient's response to changes in the patient's progress.

- Post Operative Documentation includes:
 - Vital signs;
 - Level of consciousness;
 - Medications (including intravenous fluids);
 - Blood and blood components;
 - Any unusual events or post operative complications and management of such events;
 - Patient's discharge from the Post sedation or post anesthesia care area by the responsible licensed independent practitioner or according to discharge criteria;
 - If discharge criteria are used, they are approved by the medical staff. Compliance with discharge criteria is documented, and If the patient is discharged by a licensed independent practitioner, the practitioner's name is recorded in the post operative documentation.
- Progress Notes
 - The admission progress note should summarize the present illness, pertinent past history, the pertinent physical and laboratory findings, the initial impressions of the physician and the initial diagnostic and therapeutic plan.
 - Progress notes (reassessments) should give a pertinent chronological report of the patient's course in the hospital and should reflect any change in condition, the result of treatment and plans for future care. Whenever possible, each of

the clinical problems shall be clearly identified and correlated with specific orders as well as results of tests and treatment.

- An authenticated legible progress note is required daily to document medical necessity and acute level of care.
- Progress notes must reflect the involvement of the attending physician in the patient's care.
- All progress notes must be signed and dated with time
- Consultations
 - Consultation reports shall be a part of the patient's medical record and shall show evidence of a review of the patient's record by the consultant, pertinent findings on examination of the patient, the consultant's opinion, the consultant's recommendations and the signature of the consultant.
 - A request for a review by another consultant shall be noted in the physician's orders.
 - Emergency or 'stat' consultations should be requested only when there is an emergency or urgent need for the consultation. The consultation form will remain on the chart.
- Informed Consent: a physician prior to any invasive and/or operative procedure must obtain Informed consent from each patient or the patient's legally authorized representative. Informed consent implies that the patient has been informed of

the procedure to be performed, the risks involved, any alternative procedures and the intended outcome. Informed consent is documented by making 1) appropriate progress notes in the patient's medical record and 2) by obtaining the signature of the patient or his/her legal representative on the approved consent form. The progress notes should reflect the content of the discussion with the patient and the physician's evaluation of the patient's understanding and response to the information provided. All notes should show the date and time of the discussion.

- Operative Reports

- Any practitioner who is required to attend the patient shall enter a brief legible comprehensive operative progress note into the medical record immediately after surgery to provide pertinent information for use. A complete operative report should also be dictated immediately after surgery and should include the following:

- Name of the surgeon and any assistants
- Procedure(s) performed
- Description of the procedure
- Findings
- Estimated blood loss
- Specimens removed
- Postoperative diagnosis

- The surgeon must authenticate the completed operative report as soon as possible following surgery.
- Pre and Post Anesthesia Evaluation
 - There must be a pre-anesthesia note in the patient's medical record prior to administering anesthesia that is reasonably expected to result in loss of protective reflexes. The note shall specifically include:
 - Provisional diagnoses,
 - A history and physical exam,
 - Any abnormal lab,
 - Brief description of the planned procedure(s),
 - Planned anesthesia type, including risks, benefits and alternatives,
 - Patient's previous drug history,
 - Other anesthetic experiences,
 - Any potential anesthetic problems
 - A documented post anesthesia visit shall note any intra- operative or post-operative anesthesia complications.
- Discharge Summary
 - The discharge summary should be completed before or shortly after the time of inpatient discharge from the facility and should follow the following approved format:
